## **Aboriginal heritage protection**

- access to courts, 82-83
- costs, 81-87
  - Anderson judgments, 84-86
- Land and Environment Court of New South Wales, 81-86
  - comparison with other jurisdictions, 86-87
  - need for law reform, 87

## **Administrative Appeals Tribunal (Cth) – see Environmental regulation**

## **Administrative law**

- climate change litigation – *see* **Climate change**

## **Administrative review – see Environmental regulation**

## **Administrative tribunals – see Environmental regulation**

## **Agriculture**

- environmental impact assessment (Cth), 342-346

## **Biocertification**

- local environmental plans (NSW), 128-151
  - application of certification, 135-136
  - biobanking, 146-147
  - biocertification process, 134-135
  - biodiversity offsets, 143-145
  - biodiversity values, 141-143
  - enforcement, compliance and monitoring of conservation outcomes, 147-148
  - information requirements, 138-139
  - longevity, 139
  - Native Vegetation Act 2003*, 146
  - policy and practice implications, 149-150
  - regional planning, regional conservation plans and priorities action statements, 136-138
  - related approval processes, 148
  - relationship between planning and biodiversity law, 129-131
  - standard LEP format as inhibiting factor, 139-140
  - strategic land-use planning for biodiversity, 133-134
  - Threatened Species Amendment Act 2004*, 131-133

## **Biodiversity**

- certification – *see* **Biocertification**
- conservation
  - local government finance and differential rates, 5-18
- protection – *see also* **Bushland habitats**
  - legislative and policy challenges, 35-48
    - development and economic growth, 38-39
    - legislation, development and ecological sustainability, 39-42
    - recognition of importance of biodiversity and ecologically sustainable development, 36-38

- strategic planning (NSW), 213-235
  - conservation mechanisms, 228-233
  - offsetting: critique, 220-228
  - land zoning, development and growth, 214-219
  - summary, 233-234

**Biotechnology – see Genetically modified organisms (GMOs)**

**Blue Gum High Forest (NSW) – see Bushland habitats**

**Book reviews**

- Gullett W, *Fisheries Law in Australia*, 248-249
- Gumley W and T Day-Winterbottom (eds), *Climate Change Law – Comparative, Contractual and Regulatory Considerations*, 330-331

**Building design and sustainability**

- codes, standards and targets (NSW), 486-497
  - BASIX scheme, 488
    - effectiveness in achieving sustainability outcomes, 488-491
  - general usefulness, 493-494
  - improving effectiveness, 494-497
    - Code for Sustainable Homes (UK), 494-496
    - proposed improvements to regulatory framework (NSW), 497
    - LEED for Homes (US), 496
- NSW Housing Code, 491
  - achievement of sustainability outcomes, 491-493

**Bushland habitats**

- protection, 35-48
  - bushland setbacks, buffers and corridor widths, 43-48
  - single and small isolated clumps of trees (Blue Gum High Forest, NSW), 42-43

**Carbon capture and storage – see Offshore petroleum**

**Carbon Pollution Reduction Scheme (Cth) (CPRS)**

- business liability, 292-309
  - context, 293-295
    - design of CPRS, 294-295
    - objectives of CPRS, 293-294
  - core obligations of business, 295-297
    - reporting, 295-296
    - surrendering, 296-297
  - entities liable for core obligations, 297-299
    - liable entities, 298
    - liability thresholds and coverage, 297
    - point of liability, 297-298
    - transferring liability, 298-299
- scope of liability, 299-309
  - consequences of failure to comply with reporting obligations, 299-303
  - consequences of failure to comply with surrendering obligations, 303-309

- 
- government policy, 193-202
    - complementary and supporting measures: assistance to EITE industries and low and middle-income households, 200-202
    - design of CPRS, 197-200
    - medium-term target range for national emissions, 193-197
  - mechanics, 267-291
    - calculating emissions and energy use, 275-279
      - emission scopes, 275-276
      - methods, 276-279
    - climate change, 268-269
    - greenhouse gases, 269-270
    - key concepts, 272-275
      - constitutional corporation, 272-274
      - facility, 274-275
      - operational control, 275
    - policy context, 267-268
    - policy evaluation, 287-291
      - effectiveness, 288-289
      - future effective response, 291
      - surreal economic debate, 289-290
    - practical steps for compliance, 286-287
    - structure of the *Carbon Pollution Reduction Scheme Bill 2009*, 279-286
      - administration and enforcement, 285
      - caps and gateways, 279-280
      - compensation for EITEs and coal-fired power generators, 284
      - complementary legislation, 285
      - credits for reforestation etc, 284
      - emissions units, 283
      - liability to surrender emission units, 283-284
      - liable entities, 280-283
      - objects and definitions, 279
      - overview, 279
      - small fuel distribution business (case study), 285-286
    - structure of the *National Greenhouse and Energy Reporting Act 2007*, 270-272
  - Climate change – see also Carbon Pollution Reduction Scheme (Cth); Reducing Emissions from Deforestation (and Degradation) (RED(D))**
    - Australian response (2008), 190-212
      - carbon pollution reduction scheme – see **Carbon Pollution Reduction Scheme (Cth)**
      - Poznań meeting, 202-211
      - consequences of inaction, 191-192
    - comparative law, contractual and regulatory considerations (book review), 330-331
    - environmental impact assessment (Cth), 341-342
    - Garnaut Review, 88-112
-

- allocation method, 102-107
- global and national abatement targets, 91-92
- global emissions trajectory and 21st century emissions budget, 92-102
- risks associated with overshoot strategies, 111-112
- managing transition, 107-110
- litigation, 169-189
  - administrative law, 178-183
    - judicial review, 178-182
    - merits review, 182-183
  - constitutional law, 183-184
  - international human rights, 184-185
    - European Court of Human Rights, 184-185
    - Inter-American Commission for Human Rights, 185
  - international law, 185-188
    - International Court of Justice, 186
    - International Tribunal for the Law of the Sea, 187-188
    - transboundary environmental damage, 185
    - World Heritage Committee, 188
    - World Trade Organization, 186-187
  - tort, 170-176
    - conspiracy, 175
    - misrepresentation, 175-176
    - negligence, 170-175
    - nuisance, 170-172
  - trade practices, 176-178
- Collaborative environmental governance**
  - sustaining, 457-485
    - case studies, 464-481
      - design features, 468-470
      - Environment Improvement Plan, 466-467, 470-474
      - Neighbourhood Environment Improvement Plan, 466, 474-477
      - overview, 464-468
      - practice, 470-481
      - Regional Natural Resource Management, 464-466, 477-481
    - discussion, recommendations and conclusions, 481-485
    - literature on, 460-463
      - funding, 461-462
      - group achievement of goals, 462-463
      - volunteerism, 461
    - methodology, 463-464
- Conspiracy**
  - climate change litigation, 175

**Constitutional law**

climate change litigation, 183-184

**Costs**

Indigenous rights protection, 81-87

**Deforestation – see Reducing Emissions from Deforestation (and Degradation) (RED(D))****Ecologically sustainable development – see also Biodiversity; Polluter pays principle**

Western Australian planning cases, 375-391

State Administrative Tribunal

decisions, 378-387

Hanson concrete batching case, 382-383

Moore River subdivision case, 379-382

Mount Lawley fill case, 378-379

Turby wind turbine case, 385-387

Tall Donkey Orchid case, 383-385

implications from cases, 387-390

amenity, 389-390

coastal, urban and regional planning, 387-388

definition not essential, 388-389

ESD as double-edged sword, 390

planning principles and planning review jurisdiction, 375-378

**Emissions trading – see also Reducing Emissions from Deforestation (and Degradation) (RED(D))**

European Union, 310-329

emissions trading scheme (ETS), 311-316

allowance allocation method, 313

compliance, 315

monitoring, reporting and verification, 314

overview, 315-316

scope, 312

timeframe, 312-313

use of clean development mechanism and joint implementation project credits, 314-315

improvements to be made to EU ETS, 316-319

allowance allocation method, 318

compliance, 319

monitoring, reporting and verification, 319

overview, 319

scope, 316-317

timeframe, 317

use of clean development mechanism and joint implementation project credits, 319

improvements to be made to the IET based on EU ETS experience, 323-329

allowance allocation method, 324-325

compliance, 328-329

- linking domestic emissions trading schemes, 326-328
- monitoring, reporting and verification, 325-326
- scope, 323
- timeframe, 324
- use of clean development mechanism and joint implementation project credits, 326
- international emissions trading (IET) (Article 17), 320-323
  - allowance allocation method, 321
  - compliance, 322-323
  - monitoring, reporting and verification, 321-322
  - scope, 320
  - timeframe, 320
  - use of clean development mechanism and joint implementation project credits, 322

**Environmental decision-making – see Environmental regulation**

**Environmental impact assessment (Cth)**

*Environment Protection and Biodiversity Conservation Act 1999*, under

- cost-effectiveness analysis, 337-362
  - basics of EIA regime, 338-339
    - approval, 339
    - assessment, 339
    - referral, 339
  - environmental effectiveness of EIA regime, 359-360
  - headline administrative statistics, 340-341
  - indirect benefits, 358-359
  - method, 340
  - threats to Australian environment, 341-358
    - agriculture, 342-346
    - climate change, 341-342
    - EIA impact on, 358
    - fishing, 347-348
    - forestry, 346-347
    - invasive species and altered fire regimes, 357-358
    - large infrastructure projects, mining activities and urban expansion, 352-357
    - water development and use, 348-352

**Environmental law – see Collaborative environmental governance**

**Environmental planning (NSW)**

local – see **Biocertification**

**Environmental regulation**

- merits review of decision-making (Cth), 113-127
  - AAT's balanced approach to environmental decision-making, 120-124
  - benefits and criticisms of merits review, 114-117
  - executive decision-making and judicial review, 113-114
  - potential complexity, cost and delay in AAT environmental proceedings, 119-120

- 
- proposals for reform of merits review under *Environment Protection and Biodiversity Conservation Act 1999*, 124-127
  - suitability of AAT for review of environmental decisions, 117-119
  - European Court of Human Rights**
    - climate change litigation, 184-185
  - European Union**
    - emissions trading – *see* **Emissions trading**
  - Finance**
    - local government – *see* **Local government**
  - Fire**
    - altered fire regimes
    - environmental impact assessment (Cth), 357-358
  - Fisheries**
    - Australian law (book review), 248-249
    - environmental impact assessment (Cth), 347-348
  - Forest management** – *see also* **Reducing Emissions from Deforestation (and Degradation) (RED(D))**
    - environmental impact assessment (Cth), 346-347
  - Garnaut Review** – *see* **Climate change**
  - Genetically modified organisms (GMOs)**
    - World Trade Organization
      - biotechnology products dispute, 363-374
        - agri-biotech industry, 363-364
        - appropriateness of WTO as forum, 370
        - debate over GM products, 364-365
          - ecological and environmental issues, 364-365
          - safety of GM food products, 364
        - EC approval process for GM products, 370-371
        - implications for Australia, 371-373
        - overview of dispute, 365-366
        - possible implications of WTO ruling, 367-370
          - Biosafety Standards and WTO rules, 368-370
          - conventional counterparts and GM products, 368
          - general safety concerns, 367-368
        - ruling of WTO Panel, 366-367
          - general de facto moratorium, 366
          - product-specific EC measures, 366
          - safeguard measures of EC member States, 366-367
  - Government/community partnerships** – *see* **Collaborative environmental governance**
  - Green buildings** – *see* **Building design and sustainability**
  - Human rights**
    - international climate change litigation, 184-185
    - European Court of Human Rights, 184-185

- Inter-American Commission for Human Rights, 185
- Indigenous peoples** – *see* **Aboriginal heritage protection**
- Infrastructure projects**
  - environmental impact assessment (Cth), 352-357
- Inter-American Commission for Human Rights**
  - climate change litigation, 185
- International Court of Justice**
  - climate change litigation, 186
- International emissions trading** – *see* **Emissions trading**

  - climate change litigation, 185-188
    - International Court of Justice, 186
    - International Tribunal for the Law of the Sea, 187-188
    - transboundary environmental damage, 185
    - World Heritage Committee, 188
    - World Trade Organization, 186-187
- International Tribunal for the Law of the Sea**
  - climate change litigation, 187-188
- Invasive species**
  - environmental impact assessment (Cth), 357-358
- Land and Environment Court of New South Wales**
  - consent authority decision-making, 25-34
    - court performance in development application appeals, 26-27
    - external merits review, 27-28
    - planning principles, 29-34
    - practice and procedure initiatives, 28-29
  - Environmental Planning and Assessment Amendment Act 2008*, 19-25
    - planning bodies, 20-21
    - reviews and appeals, 21-23
      - appeals by applicant for development consent, 23-24
      - appeals by objectors, 24-25
  - merit review process
    - planning reforms (2008), 19-34
- Litigation**
  - climate change – *see* **Climate change**
- Local environmental plans (NSW)**
  - biocertification – *see* **Biocertification**
- Local government**
  - finance
    - biodiversity conservation and (NSW), 5-18
      - rates and funding, 6-10
      - rating and differential rates, 12-18

**Marine and estuarine reserves**

- international framework, 63-64
- national framework, 65-66
- New South Wales planning reforms (2008), 61-74
  - advisory committee representation, 72
  - amendment and review of zoning plans, 69-70
  - draft zoning plan public consultation process, 68-69
  - enhancing Marine Park regime, 72-74
  - regulatory certainty and security of zoning plans, 66-68
  - sand dredging in Marine Parks, 70-72

**Merits review**

- environmental decision-making (Cth) – *see* **Environmental regulation**
- land-use decision-making (NSW) – *see* **Land and Environment Court of New South Wales**

**Mining**

- environmental impact assessment (Cth), 352-357

**Misrepresentation**

- climate change litigation, 175-176

**Native vegetation**

- Native Vegetation Framework (Vic), 236-247
  - application on residential land by VCAT, 245-246
  - legislative and institutional framework, 238-244
  - native vegetation loss in Greater Metropolitan Melbourne, 237
  - reform agenda, 246-247

**Negligence**

- climate change litigation, 170-175

**New South Wales**

- biocertification of local environmental plans – *see* **Biocertification**
- biodiversity – *see* **Biodiversity**
- courts – *see* **Land and Environment Court of New South Wales**
- marine parks – *see* **Marine and estuarine reserves**

**Nuisance**

- climate change litigation, 170-172

**Offshore petroleum**

- carbon capture and storage operations, 152-164
  - declared petroleum permits and significant impact test, 162-163
  - geosequestration, 152-153
  - interactions in resource management between petroleum and geosequestration activities, 157
- Offshore Petroleum Act 2006* (Cth), 155
  - security of title and resource management under, 155-156
- Offshore Petroleum (Greenhouse Gas Storage) Bill 2008* (Cth), 153-155
  - pre-commencement, 157-159
  - post-commencement, 160-162
  - risk assessment and adverse impacts, 159-160

**Petroleum** – *see* **Offshore petroleum**

**Planning (NSW)**

merits review of land-use decision-making – *see* **Land and Environment Court of New South Wales**

**Planning (WA)**

ecologically sustainable development – *see* **Ecologically sustainable development**

**Polluter pays principle**

definition, 258-259

ecologically sustainable development, 257-266

administrative orders, 264-266

approval of developments, 266

civil penalties for statutory breach, 263-264

injunctive orders, 264

pecuniary penalties, 264

internalisation of external environmental costs, 257-258

sentencing for environmental crime – *see* **Sentencing**

**Public interest litigation** – *see* **Aboriginal heritage protection**

**Queensland**

vegetation management – *see* **Vegetation**

waste management – *see* **Waste management**

**Rates** – *see* **Local government**

**RED(D)** – *see* **Reducing Emissions from Deforestation (and Degradation)**

**Reducing Emissions from Deforestation (and Degradation) (RED(D))**, 417-456

Australian initiatives, 206-208

conclusions, 455-456

international law framework, 419-435

Bali Action Plan, 419-421

financing RED(D), 426-435

demand for offsets in compliance markets, 433-434

demand for RED(D) credits in the voluntary market, 434-435

establishing a market for RED(D) credits, 429

existing public funding schemes, 428-429

full implementation phase, 427-428

national and project-based approaches to RED(D) credits, 430-433

readiness phase, 427

nationally appropriate mitigation action by developing countries, 422-423

Negotiating Text in lead up to Fifteenth Conference of the Parties, 421-422

RED(D) Plus Mechanism, 423-426

biodiversity and ecosystem protection and participation, 424

establishing national reference emission levels, 425-426

monitoring, reporting and verification, 425

nationally appropriate activities, 424

phased approach to implementation, 425

- RED(D) obligations, 424-425
  - robust national monitoring systems, 426
- key RED(D) issues and legal implications, 441-455
  - establishing baselines and national reference levels, 442-443
  - governance, 441-442
  - legal arrangements for benefit-sharing: Payments for Environmental Services, 453-455
  - monitoring, reporting and verification, linked to compliance and enforcement, 443-444
    - Australia's National Carbon Accounting System, 444-445
  - "ownership" of carbon in tropical rainforest countries, 445-453
    - conclusions about tenure, 453
    - "land" tenure and "resource" tenure, 445-446
    - "ownership" of carbon based on existing tenure, 448
    - relying on comparative jurisprudence of courts to assert tenure over forests, 449-452
    - relying on international law to assert Indigenous peoples' tenure over forests, 448-449
    - "tenure" and proprietary rights, 446-447
    - tenure in tropical rainforest countries, 447-448
    - vesting of private property rights over the world's forests, 452-453
- scientific evidence and forest sequestration, 418-419
  - latest scientific evidence, 418
  - standing forests as reservoirs of carbon dioxide, 419
- United States moves, 435-441
  - offset credits, 435-438
    - eligible countries, States or provinces, 436-437
    - issuing offset credits for national RED(D) activities
      - Category A countries, 437
      - Category B countries, 437-438
      - States and provinces, 438
  - supplemental emissions reductions from RED(D), 438-441
    - eligible countries, 439
    - objectives of the Act and disposition of allowances, 438-439
    - standards, 439-441
      - recognised activities and their implementation, 440
    - reports and reviews, 440-441

**Sentencing**

- environmental crime, 259-263
  - environmental service orders, 263
  - orders for costs, expenses and compensation, 261-262
  - orders for payment to environmental trusts, 263
  - orders for restoration and prevention, 261
  - orders regarding costs and expenses of investigation, 262
  - orders regarding monetary benefits, 262

- orders to pay legal costs, 263
- purposes of sentencing, 259
- recovery of costs, expenses and compensation, 262
- sentencing considerations, 259-260
- severity of sentence proportionate to seriousness of offence, 260-261
- types of sentence may promote polluter pays principle, 261
