Ebook distribution 2010 – *Jon Jerney*

Unfortunately, the distribution stage is still the bottleneck in the ebook process. Where music has many DRM-free distributors and a successful iTunes model, with one distributor offering hundreds of thousands of items from different music publishers, ebook distribution is still piecemeal and poorly structured, with unnecessary difficulties in the way users look for particular books. Things are changing, however, and this article looks at current trends and innovations in ebook distribution. 191

Web Watch: Useful and noteworthy websites – *Glenda Browne*

This is the second in an irregular series that will highlight websites of interest to librarians. The sites are labelled according to the type of content they provide, and include current issues, task-based sites, information-rich sites, and sites about services. 195

Web feeds: RSS and Atom – *Bill Browne*

The internet is moving towards dynamic websites with regularly updated content like forums, blogs and wikis instead of static webpages. Web feeds allow the user to receive new content on favourite sites without manually checking each one. This article introduces the concept of web feeds, explains the terminology and suggests tools of which the user might take advantage. 199
